

Exclusive Email to all the Parties in the World(2012/7/5)

Dear staffs of all the Parties in all the Nations

Water Fuel=charge density wave method can make more hydrogen gas than energy input

It's not farud,but fact. **Stanley Meyer's Water Fuel Cell(WFC)**could be emergent salvation for the world facing deadly climate caused by carbon energy.

<http://waterfuelcell.org/index.htm>

<http://www.panacea-bocaf.org/meyerswatercell.htm>

WFC can generate hydrogen gas by less energy input ,but the gas can generate more energy output than input one. However,the manifest experimental proof has been rather modest possibly due to some fear.Following is a sample.

<http://www.panaceauniversity.org/Ravi%20Cell.pdf>

** This converts to 4.66 CC of H2/sec which converts to 16.776 Lits / hour 16.776 x 2.4 watts (Faraday/lit/hour generation) = 40.262 Watts. Ravi seems to be generating the equivalent of 40.2 watts as per Faraday with just 6.12 Watts. This would mean he is generating 550% excess as the above works out to $40.2/6.12 \times 100 = 656.86\%$ 656.86 - 100 (Faraday) = 556.86% OU !! .*

[0]:The Background

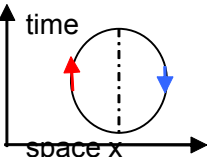

Recently I got marvelous news **Stanley Meyer's Water Fuel**,which could be emergent salvation for **the world facing deadly climate due to carbon energy**.

<http://www.ameg.me/>

Water Fuel could easily replace with **Gasoline** having been dominating the world wide. It's terrible author's mistake not to have noticed it before.Then it may be also tragedy that they had invented **outrageous mechanism**,though they could not understand the decent physical principle.As the consequence,they had to allow encoutering awful suppressions by the oil industry with academic authority.Because those(**free energy technology in general**) is evidently breaking down so called **energy conservation law** the decisive dogma in modern science.However also author could present the principle as follows in decent **standard physics**.

$$0 = +E \text{ (available energy)} - E \text{ (invisible negative gravity field energy)}.$$

To tell from the beginning, this universe was created also from **nothing energy** with **nothing physical law** (=the **almighty being**). Once this universe had been created (BIG BANG), then the physical law was to rule on. Physical vacuum field could create particle $a+$ and negative particle $a-$ simultaneously from nothing and annihilate them into nothing instantaneously at anytime anywhere in this universe. It is called **vacuum polarization phenomenon**. then $0 = +a - a$ in any physical quantities.

*			*
nothing	pair creation	pair annihilation	nothing
		<p>Vacuum polarization is breaking causality law which claims that nothing becomes nothing forever. That is a contradiction which states nothing is nothing and non-nothing simultaneously.</p>	

Then note that pair creation is **repulsive** force, while pair annihilation is **attractive** force. The latter is dominant for generating **attractive gravitational force** between two separated matters. The above mentioned matters are officially certificated by world physical society, but exception is (=the **almighty being**).

- the summary-

1, The WFC (Water Fuel Cell) based on the work by Stanley Meyer uses ordinary tap water or distilled water, this is not a common Faraday electrolysis process, the WFC uses the parametric resonance effect with High Voltage and Low Current to split the water molecule. Note the reaction cell has **capacitor** structure.

2, Charge Density Wave (CDW) radiated by **capacitor** antenna is created from nothing energy <Nicola Tesla's scalar wave technology>. Note ideal capacitor never consumes energy, but that could radiate longitudinal electric wave creating positive energy. <portable phone radiates transversal electromagnetic wave by energy consuming antenna>.

<http://www.777true.net/BWG.pdf>

3, CDW could **break chemical bonding** (so called **Coulomb Explosion**) *to generate hydrogen and oxygen gas in water ?!!*.

Now author is to try to verify it. The WFC may be charge density wave field ?! .

*Note chemical bonding is due to electrostatic force between $+/-$ charge in atoms.

[1]:**Generating H2 gas not by DC electrolysis, but by splitting H2O molecular with something AC alternate current(unipolar pulse train).**

(1)Ordinal **DC direct current electrolysis** in water never create energy ! .

1mole H2 hydrogen gas generating by DC electrolysis = <(240KJ + more loss energy) /mol>

input. 1mole H2 hydrogen gas burning to H2O = 240KJ/mol **output**, Then most efficiency =

(output/input) is told about 80%. None could create energy from this ordinal method !.

(2)Note Stanley Meyer's **Water Fuel** is generated **not by DC current electrolysis ,but by something AC one(unipolar pulse train).**

<http://www.google.com/patents?vid=4936961>

The WFC (Water Fuel Cell) based on the work of Stanley Meyer uses ordinary tap water or distilled water, this is not a common Faraday electrolysis process, the WFC uses the parametric resonance effect with High Voltage and Low Current to split the water molecule.

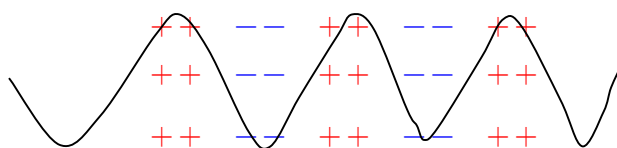

However this explanation could not be sufficient.

<http://jnaudin.free.fr/wfc/index.htm>

[2]:**Coulomb Explosion=In general , C harge Density Wave(CDW) can destroy molecular bonding due to reducing electrostatic force.**

(1)The most simple way for the affirmation.

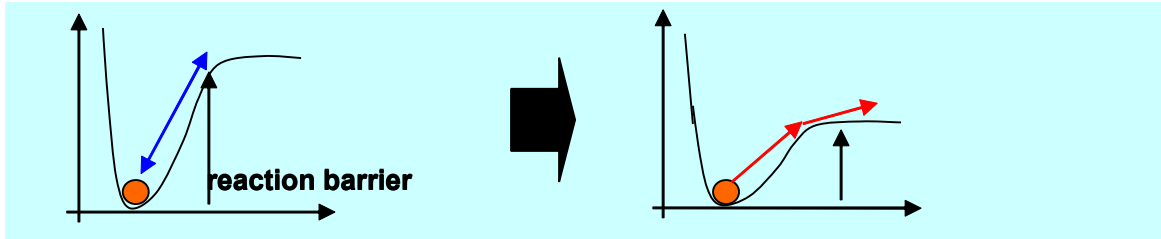

Charge density wave is similar to longitudinal acoustic wave with higher pressure phase and lower pressure one. Then former could be positive charge, while the latter is negative one.

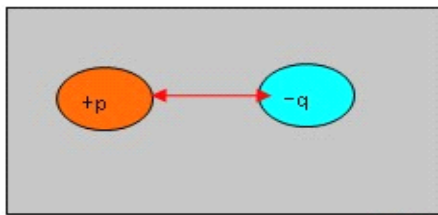

Thus a phase interval at a space is to form same charge density space. Consequently the space could reduce chemical bonding force due to static Coulomb force caused by between (+/-) charges. This is to destroy chemical bonding of water to generate hydrogen and oxygen gasses.

*example:**blight metal catalyst surface zone is CDW for chemical reactions.**

Gold, silver, platinum have **very blight surface zone** where many **free electrons are filled** and they reflect incidence light. Such zone is a CDW of DC (direct current), so chemical bonding is weakened to cause following chemical reactions in the zone.

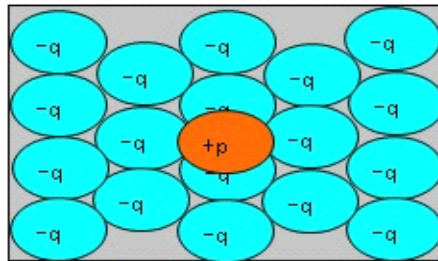

Simple explanation on molecule splitting by charge density wave.

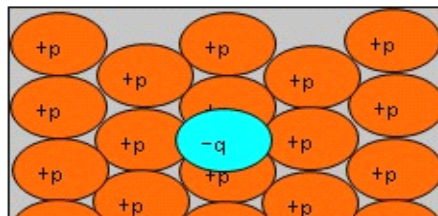

$$F = -pq/4\pi\epsilon r^2.$$

Love love charges cause attraction force

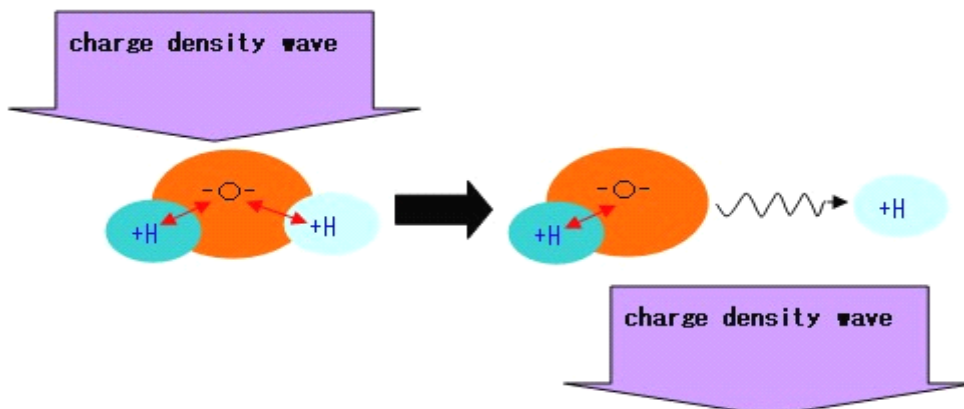

$$F \rightarrow 0.$$

Love love love love love charges cause weak or nothing force

$$F \rightarrow 0.$$

(2)"Coulomb explosion" could be seen in some websites.

(3)10141-23:General Analysis on Room Temperature Nuclear Fusion from the View of Statistical Hybrid Hamiltonian Theory, sbnp to Chem.Soc.Jpn,1991/3/13.

This was rejected paper to publish, then author shall loadup it to site before long.

[3]: Charge Density Wave(CDW) can be radiated from capacitor antenna without energy consumption except some small loss factors<Nicola Tesla's scalar wave technology>..

(1)The most simple way for the affirmation.

Charge density wave is radiated by capacitor antenna in general. Note so called passive electrical circuit elements are{capacitor= C , inductor= L , resistor= R}. Then inductor and capacitor never consume energy in general. That is, radiation of charge density wave as electrostatic field propagation never consume energy, but the wave could have energy. .

(2)This is for specialists.

<http://www.777true.net/BWG.pdf>

[4]: Total Energy Conservation Law with longitudinal gravity field of negative energy. (0)invisible space enabling attraction force is negative energy field.

Let's imagine opposite sign of charges (+) and (-) between which there is **attractive force**. To separate them so far to diminish the force, you need positive work= +E to establish zero energy state of nothing interacting force. Then initial state of attractive force has negative energy $-E + E = 0$. So attractive force of **electrical** or **gravitational** could be be **negative energy** due to **interacting media space**(vacuum field). Without negative force, matter could not be stable in general.

(1)The most simple way for the affirmative understanding.

$E = mc^2$. <Einstein's formula for mass and energy relation>. Then energy creation = dE is simultaneously mass creation = dm which generate negative energy of universal gravity field (-dE).

(2)The 2nd simple way for the affirmation.

To tell from the beginning, **electrical force** and **gravity force** were the same family member of quantum gravitational force = SU(11;1). This is due to the most recent conclusion, but officially not admitted.

<http://www.777true.net/QFTstructure1.pdf>

Therefore, it is no wonder negative electrical energy changes into gravity one.

When this universe was created in BIG BANG, so called **quantum gravitational force** = SU(11;1) was dominated toward all. As the universe goes expanding, the temperature was to

go down <in the beginning there were 12 companies,however economic decline reduced them to 3 joint coms at last>and with it, the force was to bifurcated to some families {SU(3)strong force,SU(2)weak force in nuclei ,U(1)electromagnetic force}.However dead com elements has been alive as so called zero point oscilation of extremely weak . The most famous one in such dead them is **universal gravity force** in this universe(the extremely weak force).

(3)This is for specialists.**Total Energy Conservation Low in this Universe.**

0=all postive material energy – all negative gravity field energy.

<http://www.777true.net/Quick-Gguide-to-Quantum-Gravitational-Dynamics.pdf>

<http://www.777true.net/img006-Quantum-Gravity-Dynamics-the-summary.pdf>

[5]:No patent monopoly policy on WFC could save the deadly world !!.

Certainly Stanley's invention are patents,so people must pay the copyright fee.Then you could invent **modified better versions of WFC** by the conception charge density wave(CDW).Author has been expecting these favourable results,therefore author has been disclosing the principle and mechanismof CDW.*(knowhows on CDW disclosed in my site are free,however author don't abandon the copyright itself).One decisive reason for the free is the suppression by the industry with academic authority.So authorhimself could not realize the pragmatial implementation due to lack of man & monetary power. People could not understand and support theory,but realized action. WFC could be decisive device to overcome **the emergent deadly climate collapse**.People must be awaken that this world has been upside down and going toward hell of fireball earth !!.

<http://www.ameg.me/>

*If author could have sufficient time,he wish to disclose more details on CDW with regard to WFC. For example,important **qunatitcal analysis<[2]:(3)>** on **chemical dissociation by CDW** has not been known. **This work is for chemists in general.The application field would be wide..**
