

GREAT CHANCE against global climate change crisis

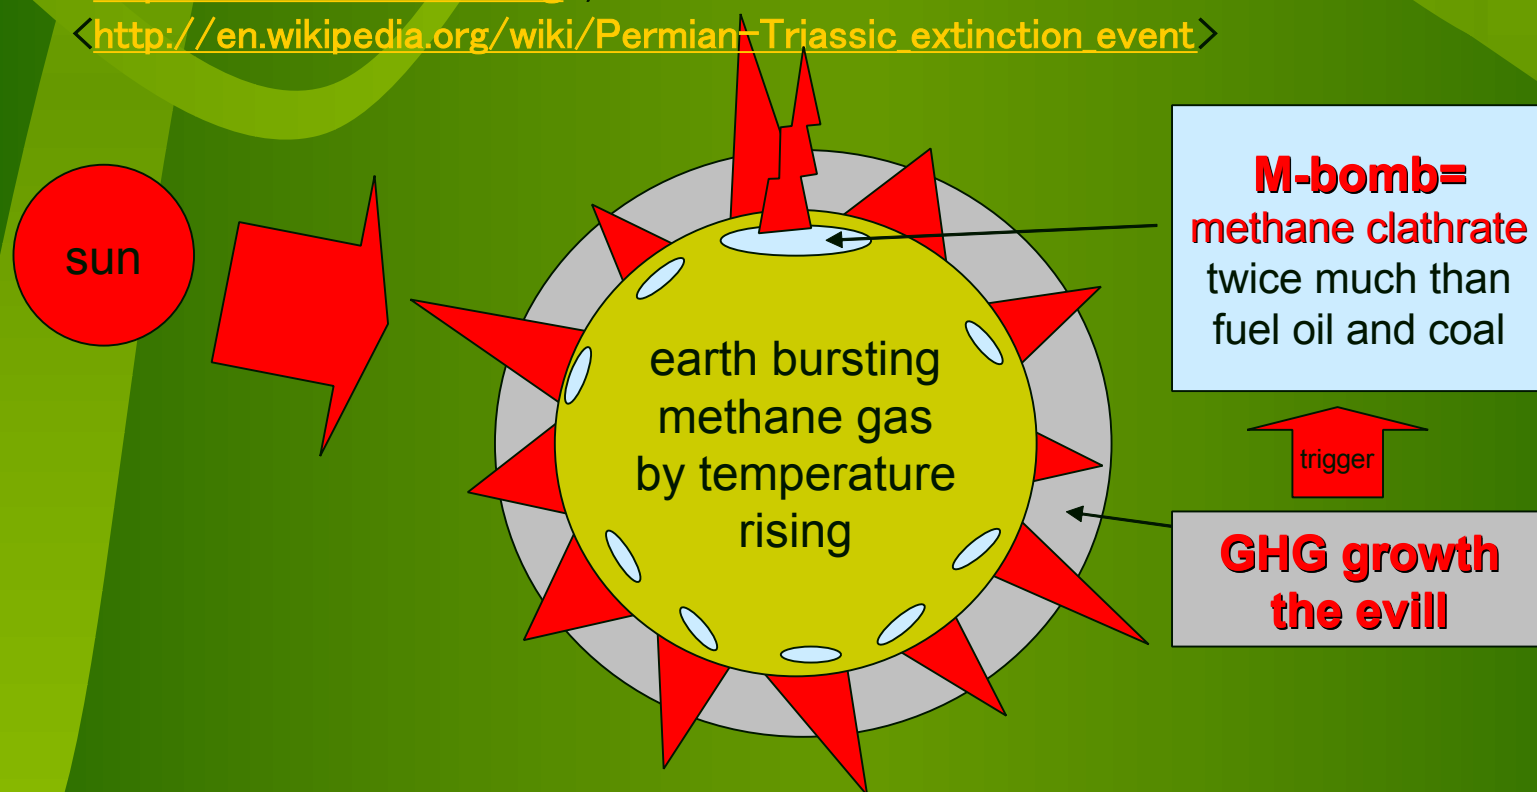

Global **R**ationing **E**conomy of **A**ttacking **T**actics

Challenging **A**dvocate of **N**ature **C**reating for **E**veryone

What we can do against global **C**limate **C**hange **C**risis!!!

Supreme Crisis or the Final Judgement

- Prolonging current situation shall cause planet perish the fire ball earth by huge methane bursting \equiv **M-bomb**.
- If global temperature $=T$ exceeds certain **tipping point T_0** of no return, T shall automatically go up to final point of fire ball earth the mass extinction of life.
- Fact of **Permian mass extinction** by methane burp triggered by volcano GHG eruption.
- <http://www.realclimate.org>,
http://en.wikipedia.org/wiki/Permian-Triassic_extinction_event

emitt CO₂= **9.1Gt** > NATURE SINK= **5.0Gt**

- natural emitt CO₂=1.5Gt.
- emitting $9.1 - 5.0 = 4.1/\text{year}$ stock as GHG in atmosphere shall trigger M-bomb.
- Man made CO₂—excess CO₂= $7.6 - 4.1 = 3.5\text{Gt}$ =allowable CO₂.
- **Without 7.6→3.5 reduction, we could not survive !!!.**
- **Kyoto Protocol(1997) = 5% ≪ Actual 4.1/7.6 = 54%!!.**
- That's right, you have entirely deceived, you never be rescued by Kyoto protocol of IPCC.
- Why such ridiculous it is !!, then you must imagine life with 54% energy reduction. Also the global competitive capitalism never be prolonged in such poor energy environment.
- It would absolutely need **revolutional change** in our life accustomed extravagant consumptions.
- Then which do you opt ?, **death in extravagancy(?)**
or **severe, but victory life by revolutional change(!).**
- Note who conspire such Kyoto protocol which force people's mass extinction?. They are invisible dominator of the modern world. Yes **the establishment of nobility & pultocracy the hereditary.**
- **Bush and his supporter** conspired reducing population on globe, but not CO₂ emitting and making perpetual global wars, but their will had been destroyed by Obama and their supporters.

GREAT GLOBAL POLICY

- Global **Rationing on Energy** as Attacking Tactics
- Fossil fuel, gas and coal supplying must be rationing within 3.5 Gt.
- **The Distribution Principle by Justice and Equality.**
- (1) each people could get the right $(3.5\text{Gt}/\text{total population}) = C \text{ Gt/p.}$
- (2) The right **C** could be selling & buying in markets.
- (3) CO2 sink creating amount could get equivalent right of CO2 emitt, which are also possible to buy and sell.

Then world would be forced to construct "**clean energy, forestrization, and deserts greenization.**" Their details are as you of all want. That is, the strategy saving foods and clean energy in **the constarined condition 3.5Gt.**

It would become unprecedental big bussiness.

CHANCE the fundamental Policy

- Challenging Advocate on NATURE CTREATING for Everyone.
- Our most failure has been destroying great powers of mother the NATURE the merciful the fruitfull and **the harmony of all.**
- Hence **the recoverization** is urgently necessary. Let 's do it together.
- People could be free by saving foods and houses in the nature.
- Especially foods entirely depend on green land and marine.
- Excess industrialization the evil had destroyed the nature.

the cooperative socialism
nature the supreme
democracy in God

the competitive capitalism
money the supreme
pulutocracy the anti God.

Sending Troops to Deserts for Greenization

- It would be unprecedented challenging war to overcome CCC (climate change crisis the war).
- Guns are to be changed to shovels, bullets to various kinds of seeds the jewels.
- Soldiers would meet the little prince in their peaceful dream like as Saint Exupery.

WORLD FESTIVAL FOR ALL

- Noworkers are deserved free food ,houses and rail way ticket by Goverment & Wealthy(GW).
- They held festivals for praying God, activities for volunteer,for educational at each distiricts by GW.
