

—Global People's Solidarity in Policy Making against the Evils— '08/5/13^29.

Now the world is encountering two growing of gap between poor and rich and of the fatal climate change crisis(CCC), both has been caused from **excess doing in competitive capitalism the international**. In this report, the most effort was concentrated in securing the minimized ideological and political ultimate agreement of, for and by people in order to overcome the crises by making **effective drastic change**. Because those are to destine people's death or alive.

As its basic structure, author employed both methods due to great result of **modern symbolic logic** and great result of **ancient teach of religions(reveration)**. As their pragmatism structure for **realizing betterness of the world**, author seek essential common feature in the methods of **Marxism, Socialism, Green Movement, and Liberation Theology**. Then he formalized problem as follows.

A social(political) problem is an optimization in degree of giving and taking on resource, wealth and political institution among people "by the definite ideology". Then people's task is to decide the ideology. For the aim, this report try to assist people solely by proposing useful, simple, but strict(?) informations. A tragedy in human being seems being caused from their **incompleteness** such as deception, prejudice, misunderstanding, distrust, stupid greedy & fear for decline.

Then key to win is one !. Any party with various flag could be, but they must be united **at least with one global policy**. Then they instantly could win history!.

☞:Almost none has been aware the unprecedented catastrophe is coming soon.

See website <<http://www.commondreams.org/views04/1215-24.htm>>

"Methane Burps: Ticking Time Bomb". It's nearly end of the world as used to be.

Now the world is just facing **mass extinction** caused by **"own innocent and greedy"**.

Those once having realized apocalyptic events were testified in

**"the two decent archaeological validities"** by geologists(ancient climatology).

Then why has established mass media been in silent on those most serious facts ?

Whether it is too late or not never could be proved without possible doing.

## ① Overview on the international conservatism vs reformatism :

(1) Evil symptom of status quo:

(a) Centralization of Wealth and Climate Change Crisis (CCC):

Almost nation has both conservative rightist and reformative leftist party. Then right tend to secure own class benefit (**pultocracy** by chaebol the **hereditary** or cronyism politics). They advocate superiority of **competitive economics** with **meritocracy**. Then an **economy dynamics** is to accrete to get more money for who has more money. Consequently their money grows beyond their substantial ability. Can you imagine a person of thousand times ability than others ?. Now the era has come to point when their excess doing in huge growing economics turn to cause own-destroying called global **climate change crisis (CCC)**, especially for which they has nothing substantial ability to stop. Fatal defect in capitalism is nothing capability without growing to own-ruin.

☞ : Extremely simple supposing that growing speed of wealth was proportional to amount of wealth-itself, wealth grows explosively (exponential function).

☞ : So advanced nation usually employ **progressive taxation** in degree or others. Therefore a taxation system is a measure of democracy degree of a nation.

(b) Unstability of corporate being in competitive capitalism:

A corporate governor may wish to pay higher wage, though it is considerable limit within not stopping own growing. They are too nervous own growing, without which they become cautious own decline. Their satanization is solely due to possibility of own corporate **hegemony decline** in the competition. Also corporate union has quite similar cautious. Though it may be indispensable that corporate becoming useless should be annihilated in the regime. Then the problem is to relieve people, but not corporate. If there was no such mechanism of autonomy, social system as a whole is to lose their adaptability in metabolism. For example, rampant debts of nation or bureaucracy of nothing bankruptcy shall be more harmful to whole people at last.

(c) **Mind of corporate owners<the accelating mechanism or excess doing>**

Capitalism engine may be competitive inovation and investment with their growing & decline. Thus they could not help to do everything possible. Then the problem become how degree they seek possibility. Thus accelating capitalism become aggresive or become **excess doing** such as grwoing gap between rich & poor and supremely hazardous CCC. Why they should be accused is soley due to their impossibility of turning to stop the wrong status quo causing crisis, which might be accepting their decline. They could make certain compromise for securing stability with competitors in corporate governer ally.

It could be applicable now in domestic, but rather not ease in international. Overiewing industrial history after the 2<sup>nd</sup> war, corporate decline has been caused mainly from international translation of industry from advanced nation to develloping ones. Then those who has much monney to get foreign industry producing with less cost shall win at last. After and above all, those who has much money shall win in anyhow. Therefore they become soley think of targets which yield money. How much money, there is not enough. Thus they become also brutal for anyone who are aginst them. People should know that they has made more strong solidarity than that of people-themselves. Hence people could not win in the past.

## (2) Overview on the common features of international reformative movement:

Then left wing seems to have international **common features on their ideology**. In the long past history, they had been **Socialists of Democrat or Marxist**, also **Church men** started battle against actual social injustice. Recent remarkable feature may be numerous advent of **Green Party in each nation**.

(a) All of them are commonly against with **excess competitive, monopolic and self-destructive the capitalism international**. That is anti-regime movement. Those are the motive caused from wish to overcome evils by reforming society. Then problem is how to reform society the status quo.

(b) Maxists believe that establishing monopoly by working class is the final relief.

(c) Socialist believe that establishing society by employing solely merits of both in socialism and capitalism is the final relief.

(d) Liberation theologian believe that realizing social justice and welfare by God's teaching is the final relief.

(e) Greens believe that sustainable greenized life way is the final relief.

This report intend to make their belief as their strict confidence by extracting solely **essential common ideology** in their beliefs.

## (3) Global conflicts between the conservative vs the reformative

(a) At first, author warn an actual aspect of above mentioned reformative movements.

It has been already well known to them, though, he could not help to refer the **invasion of camouflaged betrayers** in the movements. Too much doing for the problem has dangerous possibility to destroy their solidarity and to make movement unstable.

(b) It is also easily comprehensible for anyone that reformative movements has been unfavourable for **force the international conservative**. Especially and typical their watch dog is called **CIA (the anti-communism machine)** placed in almost countries. Frankly to tell, the activist and their supporter should know that anyone of you might become target of CIA.

(c) How to overcome the problem:

It is also simple. For example, author has been endeavouring to extract essence of truth which has been unfavourable for CIA. Such truths could be utilizable for detecting betrayers and defending org.

## ② Political Movement by Marxists and Their Environments :

(1) What Marxists has been saying for capitalism is right, so they has been severely suppressed than any ideology groups since their birth. But what they had done for communism-itself were many of wrong as the results.

(a) Capitalists exploit worthy of worker's products (poor nation's resources) and make huge benefit growing circulation in their dominating regime. As the fact of now world, the centralization of wealth into few riches (chaebol) is evident, while wealth gap of people and nations has been growing monotonously in competitive capitalism the international regime. That is, who has more money is to get more money. The excess doing shall cause own-destruction at last.

(b) However main stream of communism regime had been ceased when USSR-themself abandoned their regime (1989). Now they are minority in the world.

(c) To tell it frankly, the belief on communism has become that of minority of each nation in divided sectionalism by the inner ideology conflict. It is also true that the belief on Marxism has been still attractive for many people exploited and discriminated by the capitalism regime. That is belief on **class struggle or ethnic one** in each nation. After all, they could not have found any relief except Marxism. The former religion seems to have been insufficient in rescuing such people exploited and discriminated due to fear for Marxism being against religion.

\*There is a remarkable exception called **the liberation theology** in Latin America.

<[http://en.wikipedia.org/wiki/Liberation\\_theology](http://en.wikipedia.org/wiki/Liberation_theology)>

(d) The most rich nation USA has been simultaneously the most brain washed people's nation of **anti-communism** by thoroughly fascism education and mass media operation on people's consciousness and unconsciousness and also by thoroughly giving prosperity with mass media operation in order to purchase people's mind. Their secret may lie in international structure as lower and upper class nation. Americans live in upper one where they could see down other nations<sup>(1)</sup>. The structure **American imperialism** had caused many brutal and cruel situations in the exploited world. Above all, American citizens should recognize many of the actualities and the sin.

## (2) Why has Marxism not realized in global world ?.

(a) After all, capitalists have succeeded to win majority people's mind of wishing to become more rich in the regime, but not in the communism one even though they perceive defects of the regime. Western side people in capitalism had known superiority of the regime than that of communism such as Russia, China etc at that time by comparing the degree of livelihood.

\*As had been so, even such Russia and China-themselves had changed traditional communism regime to reformed socialism (China) one with introducing free market principle. It might be telling as follows. Such result may have known at first, because competitive economy regime has superficial superiority in **innovations** than that of routine work in bureaucratic regime in "**economic growing phase**".

Although the era has come to the point when the situation had entirely changed in encountering global CCC in livelihood environment, which had been caused from **excess adaptability<sup>(2)</sup> of competitive economic regime**.

It become far worst to do too much than to do in lazy.

(b) The wealthy western chaebol had made thoroughly conspiracy against communism to confine them in few nations as international strategy, and also in domestic one, they had succeeded to win majority people's mind with subtle but severe suppression on communism movement. CIA the Satan with nondisclosed their expenditure has been mainly against communism, so they had known it thoroughly to detect, invade, and manipulate. To tell as for leftist movements in Japan the American's slave island has been terribly invaded by CIA<sup>(4)</sup>, thus their task is to confine people exploited and discriminated with camouflaged solidarity. It's entirely **upside down** that communist allows monarchism in Japan. Another task is against reformative force in their behind to assist conservatism.

(c) Any regime of evil wish to set up **outer enemy** in order to accomplish unity of the regime and hide their internal defect by making people's attention for enemy

(d) **Monopoly by Beurocrat** <the advent of new dominating class> :

Centralization of political power in communism had proved the new advent of dominating class called **beurocrat**. The new advent class did similar suppression against lower or opposite people. Thus people had disliked the regime.

(e)**Mistakes in person worship as mobocracy and stubborn dogmatism of ideology:**

Anytime, anywhere good leader and hero are desirable. Though communism regime has tendency of person worship in long term of fascism with **dogmatism**. Person in dogmatism tend to disdain reformatism and might be also in higher pride which is also a feature of Satan.

(f)Why had Russia established the first communism-nized nation ?.

In western Europe, there seems being ingenuous tradition who fear races in far region and with singular ability such as Jewish, Russian and gypsy,....

(g)In the long past history, capitalist could secure persons of ability among people with higher wage, while reformativist adopt persons with lower wage. Then which could win?. Therefore people should more assist by huge donation for favourable movement. Then even rich CIA could never could be allmighty. For example, recent Latin American had succeeded to establish leftist governments.

(h)**Success in education and medi-care without home-less.**

People's equality in education and medi-care had been realized in communism nation. Author once had travelled in Europe when he could not find home-less people in communism nation, but in western Europe, he could.

(h)**Even though as it had been, how to overcome today's difficulty in Marxism:**

Also author had concluded that the supreme problem must be overcome now world is to live or to die in future crisis caused by the **global CCC**. Who has been against this evident fact is solely silly right wing. Thus it is also the most class struggle problem now. Crisis might be also a chance to establish global political solidarity.

### ③ Social Democrat Movement and Their Environment:

- (1) Instead of communism or dictatorship by the proletariat, both of them made compromise of co-being of capitalist and labourer, or they tried to secure betterness by employing solely merits of both in communism and capitalism, which is called social democracy. In western Europe, people has traditional tendency to wish social democracy and they had succeeded in fairly favourable degree.
- (2) However, in Asia and south America where influence of America is stronger than any other nations, even social democracy has been difficult to realize until now. To tell as for the case of Japan, the most leftist force Japan socialist party had become destructive by long term CIA conspiracy against them. Then the concealing of CIA never has been disclosed in public.
- (3) Social democracy movement has been deeply connected with labour union one. Therefore their policy has tendency to reflect the benefit of corporate (or administration workers) labour unions. As the consequence, occasionally they become more conservative than anyone else. By occasionally, people must accept bitter policy in order to realize more benefit of a whole.
- (4) CIA made conspiracy against international labourer movement, to whom they invaded by CIA agents in order to make the movement toward right wing<sup>3</sup>. This fact never could be negligible to recover original aim of the movement. In anytime, anywhere, they endeavour to conspire weakening of people's force by inducing **betrayers** in the movement of people. There is definite technology trying to against the conspiring. <see website <http://www.777true.com>>.
- (5) **Publicalization in administrative action** is certainly one solution for establishing people's equality, however, at least, personal management of higher class in bureaucrat should not be fixational, but changeable.
- (6) **Social Democracy Movement has Versatile Ability to Establish Social Welfare.**
  - (a) Nation's huge revenue is contributed from corporate tax and income of individuals. Pension, social insurance, and private deposit fund are also huge amount. Problem is their usage, which should be investment for "the Green". It means securing "**minimum sustainable livelihood-level for everyone**".
  - (b) To realize genuine socialism, then **international common regulation** on trading, corporate activity & labourer condition etc may be indispensable.
  - (c) Social democracy has been main stream in leftism, so their ambition with generosity is more desirable than ever.

#### ④ Political Movement by Green Party and Their Environment:

It was great surprise for author that almost nation has green party movement.

<political movement(interest groups and other social movements) :

<<http://www.psr.keele.ac.uk/parties.htm>>. Remarkable and favourable feature of them may be their unity in making policy and organization activity.

Above all, their modernized platform is easy to understand for everybody. Their motive may be caused from actual crisis feeling on the excess competitive capitalism, which might be destructive to own livelihood environment. The former leftist movements which has been still as it was seems to be weak on the current problem. So they have been obliged to stand up by own selves.

(1) Their motive may be caused partially from animalistic instinct which could not help to be with green environment. People get the most relaxation feeling in green field, but modern urban field activity is with more stress.

(2) Also they had convinced the evil of competitive capitalism the international who has still been exploiting natural resources of the world with their awful greedy. They recognize that it might cause fatal results in recent future.

Thus their top common slogan is **sustainable society** with the economic regime.

This theme is obviously fatal in future society, because it is the supreme problem of death or alive of us human being !.

Above all, it must be the most priority problem than any other matters.

(3) Above all, their conclusion of recovering green power is easy to understand for anyone in the international world. First of all is securing foods for livelihood, which is entirely depend on natural green environments.

#### (4) The Ten Key Values of the Greens

<<http://www.greens.org/values/>, <http://cagreens.org/platform/10k.shtml>>

##### (a) The fundamental Philosophy:

Social Justice/Personal and Global Responsibility/Respect for Diversity, Feminism, Handicapped/Decentralisation/Grassroots Democracy/Nonviolence

##### (b) The fundamental ideology for policy executing:

Future Focus/**Sustainability=Ecological Wisdom**/Community-Based Economics

(c) Their problem may be how to become main stream force in each nation. Then we feel rather difficultly to find something breaking through point. Still now people's main concern has been in income and consuming in the regime.

## ⑤The Libreration Theology and Their Enviroment: :

The essential cause of unhappiness both in Latain America & Japan may have been the same. Because both of them has been in same situation mostly infulenced by America. They has been terribly exploited by the brutal America. In authors opinion, it is incomprehensible that people of delightful and ability of Latain American in such more resouceful, beautiful, and broad land nation than Europe has been in less rich than Europe. And also they has been commonly obliged to be in long term political and economical conflicts against USA. Therefore, bitter but resolute leftist movements in there has been more active than any where. Then also church men in poor people had to stand up for their liberation (**Libreration Theology=Christian Socialism**). Now author has not sufficient detail of knowledge on it, so you should consult following website or others.

<<http://www.landreform.org/boff2.Htm>>

<[http://en.wikipedia.org/wiki/Liberation\\_theology](http://en.wikipedia.org/wiki/Liberation_theology)>

Thus this movements steadily has become wide regional one. For long time, it has been a tragedy between leftist of Marxism and Church men of religeon both of who has responsibility for liberating poor class. Since Marxist had once denyed religeon as narcotism paralyzing people's mind not to recognize actuality of evil world. Then church men had to be against leftism. Now era has come to tell to them that both of them are right and they should reconcile with each other.

Because the front line of mathematical physics had succeeded to conclude (1)**the being of God and spritual in the other world**. Not only it, also actuality of religeous reberation also had scientifical validity. It concerns with physicall possibility of (2)**religeous prophecy** by (3)**person the ability paranormal**. As the consequence, author had to turn his research regeon into religeon, which enabled above mentioned matters. In this report, the unity of religeon and science is a kernel, by which reader may promote more own confidence on democrat movement.

☞: **Prophecy by person the paranormal in democracy:**

It's may be conspiracy by the establishment that prophecy by person the paranormal has been right and hidden since ancient. Although dominater had know the secret very well. Silly modern science has been utilized to exclude it from people. For example, secret society of world elite has common entrance ceremony of **re-incurnation**. Then the other world is that of allmighty(God and spritual the ability paranormal). Now the time has come to invite them to cooperation with global democrat movement !. See website of the great Brazillian prophet Nobrega Jucelino da Luz<<http://www.jucelino.daluz.nom.br/principal.htm>>.

**⑥A Suggestion for Making Global Solidarity:**

(1)How to do we reform the incompleteness ?!

Humanbeing could not be complete, but be incomplete. Anybody had done both right and wrong. Then how to do we reform the incompleteness ?. In anyway, the possibility may be to endeavour to collect truths from the world without any prejudice and any hesitation caused from peculiar own situation. Then adherence on local egocentrism which deny even objective facts become the most obstacle. Therefore decent people should struggle any injustice.

A social problem is an optimization in degree of give and take among people "by definite philosophy". Then the definiteness of philosophy must be examined thoroughly by theoretically (**logical truth**) and experimentally (**statistical data**). For example, democrat voting is typical and effective statistical data. Although such democrat voting sometime turn to be bitter mistakes due to its incompleteness. Although it is also true that there is nothing means without democrat voting in politics which often concern with serious destiny of people. Therefore people should thoroughly debate on **its incompleteness** in precedent. For example, at first, most American had made serious mistake to agree Bush administration's invading on Afgan and Irque due to the demagogy which had been subtly accelerated by terrible cautious for American's own safety in 9/11. Thus in order to deceive people, they are opt to stimulate people's egocentrism

In anyway, the definite philosophy made by overcoming on conflict between the completeness and incompleteness may become kernel.

.....

Thus we could make agreement and solidarity in global people at last.

Anytime, anywhere, an excellent leader is people's earnest hope, although, also any leader could not be complete. Also people should recognize own more incompleteness. It may be also true that such incompleteness might can be supplemented by somebody in people. Then none could tell who is "somebody" in precedent. Therefore people must be given equal opportunity and responsibility.

As for unknown possibilities, also mathematician suppose equal probability. Also Lotus sutra imply people's equality due to incomprehensibility of the world. Also Islamism emphasize on people's equality and solidarity in God.

(2)A stability(of the order) seems to be caused from balance of duality which are something elements opposing against each other.

Although only **evil** must be destroyed to least as possible.

**After all, only this seems to be the supreme common task for all humankind.**

In the sense,religion seems to become necessary for teaching the fact and persuade people's action against evil.Then note that the word "evil" is **upside down** sequece in characters "live".That is,evil implies death.

Therefore all decent religion commonly inhibit us insignificant killing life.

Upside down doing is that of Satan who has been against God.

As for all that without it,people may be better to be free as possible.

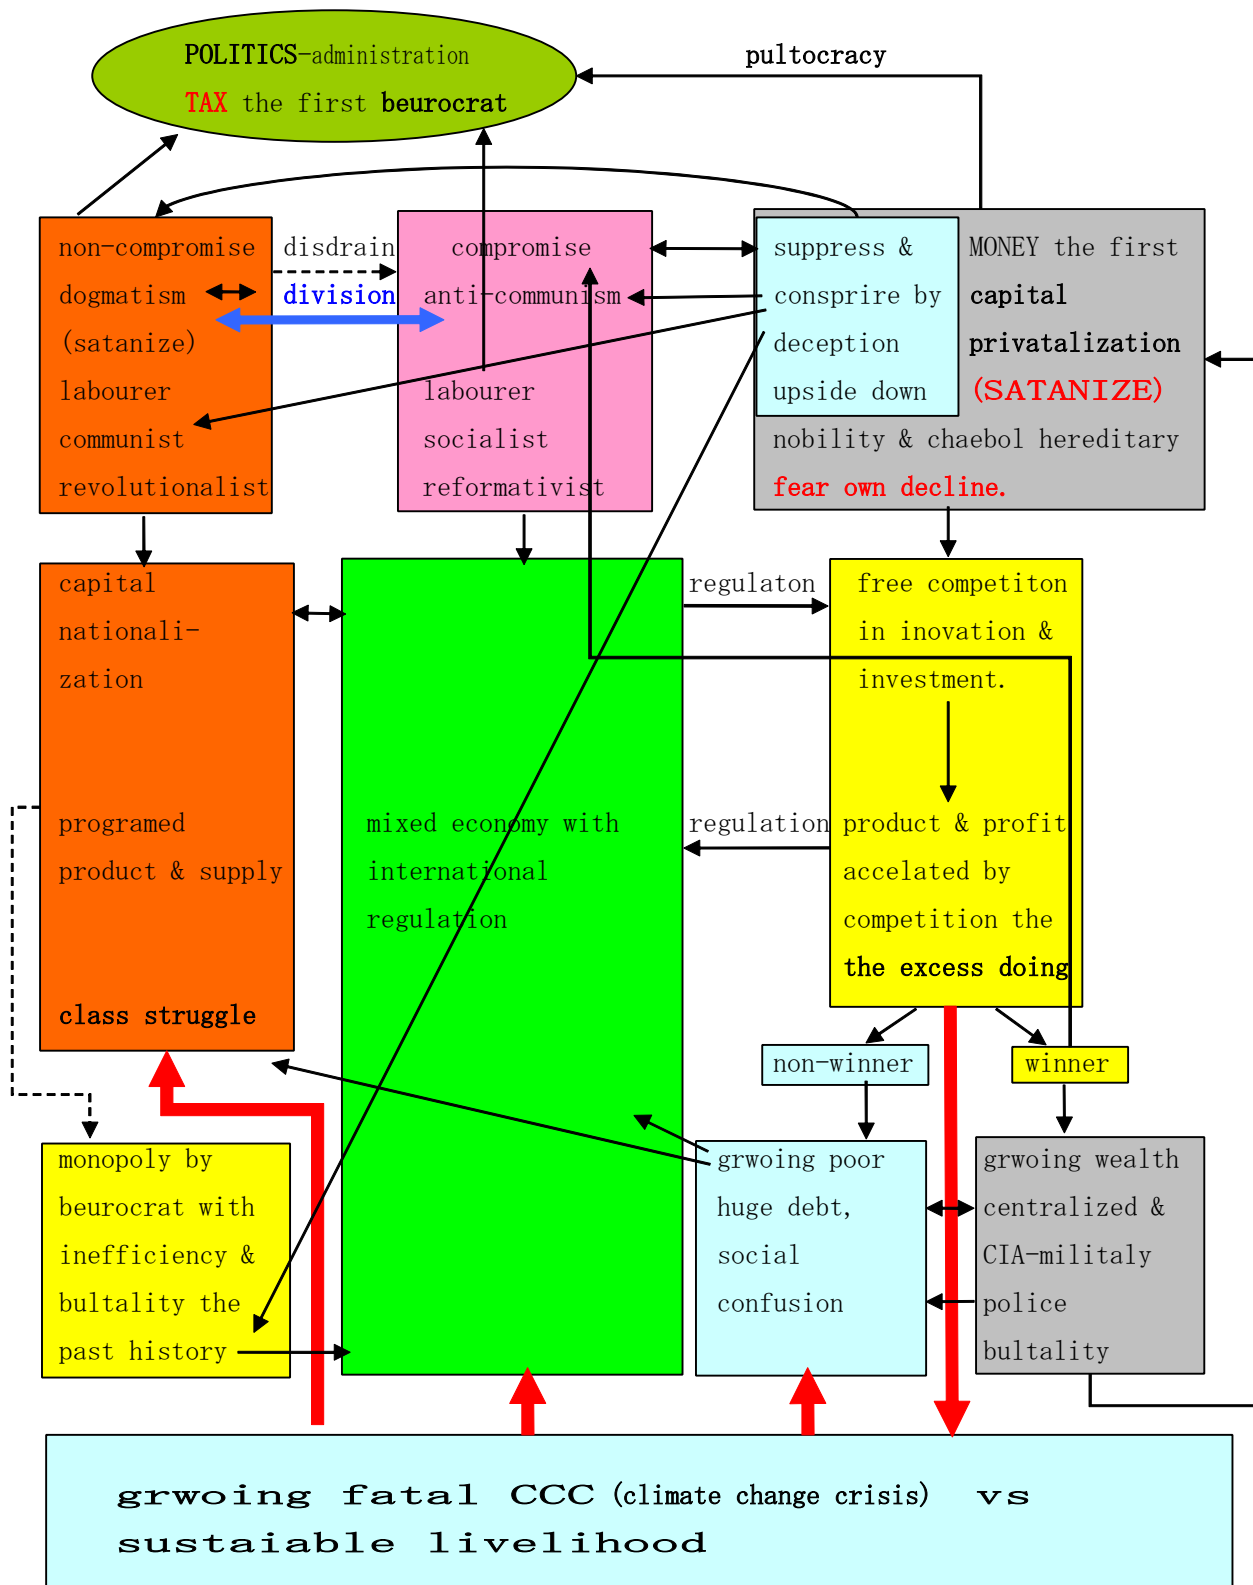

(3)**Then what is the evil ?!**

According to common conclusion of decent religion and ideology,at least, those are unjust and insignificant people's death and suffering in caused by incompleteness of humanbeing-themselves.In other word,people must be co-live with equality and make their solidarity against the evil.

SUPPLEMENT-1 :Review on Capitalism vs Communism their conflicting structure :

Now we may have enough time to spare for absurd familiy quarrel !.

- (1) {Free, equality, phylanthropy} is French republicalization revolution slogan, which must be **the decent most people's common wish**. On the other hand,
- (2) {free competition by **meritocracy**, possibly in originaly equal oppotuniy, but in final, wealthy win more oppotunity (**hereditary**), fear for decline cause excess caution on people against wealthy (**satanization**)} might be hidden slogan of the **capitlism**. The most of evidence is CIA which has been watch dog of them. Above all, they has no ability to stop the CCC. Satanization is against God whose true will lies in people's co-living in equality.
- (3) Then correct solution could not be capitalism status quo, but be communism ?!
- (4) Retrospecting on realized communism history, it is found to have been also Stan. For exmaple, Stalin had made prison camp and massacre for tremendous his opposer. The death were said to be 20 million. Similarity was also seen in Polpot (2million) and now Kim Jong-il. Those were all **hells**. German once had made both capitalism nation and communism one simuletaneously, then communism nation people were likely to escape there.
- (5) Although, the largest 2 times wars in human history had made by capitalism nation Germany and Japan which made genocide more than (20+40) mllion.
- (6) The CCC shall be far cruel hell than such prison camp in communism. Because if the current situation being prolonged, it shall be the most genocide to perish humankind (**the final judgement**). Climate having once changed would continue more than thousand years (climatologist's saying). At now, Johon's revelation has been with re-found reality. It has been saying rare curious in the decent new testament. That is, coming era the final judgement and sudden and abrupt realizaing of **thousand year** (yesrter year) **happy kingdom**. However, there could not be found any validity of becoming happy on the earth. On the contrary, it may be more possible to become hell of yester year as the reality in climatology view. BMB (germany car maker) once had made TV commercial where a man stand on road near at steepest cliff, then weather abruptly had been changed to dark cloudy and severe rainy with wind. He started his car to rush through there with high speed on dangerous curved road at hedge of cliff, at last he turned to escape there with look of having been relieved.

(7) If both were wrong, we human being could not find correct solution.

Then we should not neglect important role of serious concern by boss of capitalists who had subtly supported those satan communisms. At first, USSR was established by hidden supports of Euro-USA chaebol. Another is Kim Jong-il who has been superficially against USA, though his status has been invisibly protected by USA. Because USA in anyhow and always need bad actor for conserving domestic fascism regime. Anytime they (**junta**) could not be without enemy. Author's one assumption is the former realized communism was realized as nation for which people dislike and fear.

That is, the former realized wrong communism was conspired to imply and to force people **anti-communism** by capitalists the international. To tell the fact, it is capitalism the **narcotism** that paralyze people's mind to cease judging turthes of the world by the superfical and fluent material prosperity.

(8) **Solution?:**

(a) For accomplishing social justice and people's equality without exploiting and discrimination, communism the fundamental idea is right.

(b) However none could succeed to realize the ideal without defects in the past.

(c) To tell for modern capitalism-itself, sorts of communism (publicalization of product means) had once established in the regime as called **public enterprize** such national telecommunication, postal service, railroad, university, hospital,

(d) It seems partialy due to insufficiency of technical aspects. Publicalization of pruduct means is equivalent to become people beurocrats. Then routine work-nization in the past beurocracy caused bad reputations. Also dictatorship government had done many wrong to cause fear of people.

(e) Scheduling productivity in corporate by estimating demand (market reseach) has been general. If economy activists positively exchanged their scheduling in precedent by certain institution in order to reform their scheduling, it would be said semi-programmed economic regime with less loss efficiency (relaxation in competition). To tell for resources limited in product amount, there might be an optimized rationing with optimized cost in international market by certain definite ideolgy. In author's opinion, certain principle (ideolgy) had been once determined, there comes out an **optimazation algorithm**.

Then most problem is that manybody will not notice nor tend to think the being of problem-itself to be overcome in or to reform "**the established methods**".

## SUPPLEMENT-2: CIA the fundamental.

① The task of CIA=Taking all for benefit of America(the establishment).

(1) This advocate implies their **supremacism** <the stan engine>

(2) Hegemonism as American imperialism in military, economics, technology, ideology.

☞: Without prejudice and hesitation, anyone should show them their wrong.

② CIA detect possibility of becoming non-favourable person, org, and nation by collecting all informations legally and illegally in the world.

☞: It's necessary to defend information with contaminated noise.

③ CIA attack person, org, and nation the non-favourable (targets) by conspiracy.

(1) Propaganda the demagoguery by trapping target into various trouble in order to divide target from supporter people. **Those are always deceptions toward people.**

(2) As for non favourable reformatory government, CIA would conspire subtle social confusion and instability to break people's trust on the government<sup>(5)</sup>.

(3) Conspired traps to person are scandalous failure in money, sex, status abusing.

☞: **Precedent counter measure** is effective in case the agents had been known.

None should think of nothing attack by enemy. Then security specialists are necessary for forecasting, detecting and training as prevention.

④ **Criminal invasion for person:** Political assassin must be strictly detected.

Then attitude of public authority may become problem. It is absolutely necessary for **democrat police and soldier union** to secure status and conscience liberty of lower class ones and to prevent autocracy of boss.

⑤ **CIA agents the betrayers, or deceived one as marionette :**

It is unique cause that we have been defeating.

(1) At first, hereditary class cautious own decline tend to become betrayer.

(2) the 2nd is their subordinates groups and person corrupt, .....

(3) political effective org (politics, religion, corporate, bureaucrat, mass media educational, regional and other various org, ...) and the chiefs.

(4) CIA detect person's weak-point and tied point and utilize them as marionette.

**CIA utilize any person from king to homeless for their aim.**

Then people should know the advantage of non localized solidarity than local egocentrism. If they had once known true intention of CIA, such solidarity could be soon realized. Above all they are expert on deception by stimulating egoism. CIA the Satan's essence are **deception** and **violence** against God's will.

### SUPPLEMENT-3:How to defend good organization against CIA invasion:

- (1) Good leader is indispensable, but person worship is likely to be mobocracy. Leader should be changed in certain term to secure soundness and metabolism. Person worship as mobocracy is often found in conspired org and nation. CIA usually conspire and manipulate org & nation "through few person". It is evident that manipulation on singular person is far easier than whole of members in general (**propaganda for public** has been also the most task of CIA). Person in worship is often made up in CIA theater with CIA scenario.
- (2) CIA agents the actors for operation in the theater with scenario are invisible group member tied by common status (bureaucrat, corporate, various org, regional-**fixer & sub**), ideology (right and also pseudo left wing), benefit in money or status, or person threatened, fear, gludge, hatred, something trouble in his mind.
- (3) Their common character may be tendency to rely on stronger those who order and give (a sort of child) without sympathy & guilty feeling for others. Typical example may be [the cult Oumu-shinrikyo](#) (poison gas attack in subway in 1995). They have been made up by deception by subtle teaching and implication. CIA is developer and expert in **implication method** for manipulating mind of people. Direct persuading people is possible to deny, but once implication had invaded people's mind, it could not deny, since implication in mind is thinking-ownself. CIA agents are actor (actress) who plays implication toward target person. Person in trouble in his mind is likely to be trapped by implication. Hence target person is likely to be trapped in trouble conspired by the agents. Hence CIA is used to rise confusion in person, org, nation and the world.
- (4) Therefore, once, person who had understood this mechanism could overcome deception by implication without clear and **responsible** statement-itself. It is effective to know not only enemy, but also own thinking-itself.
- (5) Above all, CIA is good at stimulating people's greedy in status, money, sex, honor, gludge, hatred, affection, fear with threatening and tempting. Then **egocentrism is the most friend of CIA,** which enable betraying and dividing people. Hence person grown up whom CIA has been hatred should be cared for by his subordinates.
- (6) The kernel of CIA is deception (by upside down) by various method. Their scenario is always typicalized one (manualized), so once having known it enable overcoming.
- (7) Conspiracy and **information theft** are always twin.
- (8) Organization should make the manual and training program on countering CIA. Author may have many information by his singular long term experience, so anytime he wish to testify those facts.

#### **SUPPLEMENT-4:Scientifical technology never could make life.**

A remarkable feature of modernization is people's excess specialisation in certain specified sphere due to higher technical progress. Consequently people seems to be incomprehensible for whole system action and also for the basis on which they stand. They have become more and more egocentricized with weakening in grasping others. It's fatal, since **problems overcome are all non-localized = globalized ones**. It is too hard to make it upside down what we have been made to absolutely believe such as modern civilization growned by scientific technology with growing economical greedy motive are favourable for human being.

Modern technology is found to be a sort of fake, because, for example, Polynesian island people could get dairy necessary many foods and furniture with ease(?) only from coconut tree which is completely reversible production without any harmful. Then could we produce wheat, corn, and beans (life resources) from industrial factory in way of completely reversible production without any harmful? No not at all, or for the time being, it is far hard to achieve. After all, our civilization technology is impossible to make life, but **on the contrary**, they are to perish global life forms.

The supreme scientific problem may be **creating life in chemical testing tube** from non-organic materials. Certainly a kind of simple amino-acid had once been made from non-organic in test tube. Although supreme high polymer amino-acid of self-reproducing may be impossible. Because such possibility is perhaps "zero" (then note that real number zero does not mean nothing). If it were finite probability, it means observable repeatability of the realization, which should be observable (in neighbourhood of volcano mouth in hot sea bed?). It does not need observability of complete self-reproducible high polymer the most primitive (life), but, at least, similar something (incomplete life = corpse?). However we never heard even such tiny fragments evidence in the past. What author wish to say is that creation of life is entirely miracle (real number zero \* probability). We modern humankind seems to be too arrogant for sorts of life as years goes on.

**SUPPLEMENT-5: Why has politics not been going well, why religion be ?**

Those had been caused uniquely from certain humanbeing's nature.
