

Reserving at least A Day for Decision Making on Die or Do by everybody together !!..

2019/03/06

Also this Site Mission is to ensure nobody can say: I didn't know the **Conspiracy of Climate Extermination !** ' Note no wars in the past had caused planet extermination, but only climate is entirely different. Now any planet people had known climate worsening by own observing and frequent news. However, nobody seem to seriously act against those, but live life as usual. While governments who are responsible nation people's life security, they seem to have been acting well by such political COP annual global meeting. However they never disclose imminent deadly risk of Arctic Methane Catastrophe, which would burn planet !!!. Unless urgent drastic global regime change, it would surely happen before about 2040.

[1] : Minds the Not Change.

I don't know, or can not admit the reality that it is extremely urgent problem of *do or die*.

(1) *I am too busy to save imminent business as usual, so can not seriously care the problem.*
Above all, overwhelming massive others has been doing so as I am now.

This is also case of **Top Leaders in Business, etc and Politics** who has been neglecting **the most preceding fact disclosing**, therefore, various events, perpetual disputes in domestic and abroad has been being recommended by the wicked spirit in highest position⁽¹²⁾.

(2) <i>I don't have known the reality</i>	(5) <i>I have known the seriousness, But can not admit. Because,....</i>
(3) <i>Nothing awful reality informed by school-mass media-scientists</i>	(6) <i>It is too inconvenient for imminent business & life as usual</i>
(4) <i>I am leaving it because government and the world seem working seriously.</i>	(7) <i>The problem seems extremely big to tackle. None will seriously tackle, so do I</i>
	(8) <i>It is deadly fact never told loudly, and had become too late to tackle</i>
<div style="border: 1px dashed black; padding: 5px;"> <p>☞ : <i>extremely big to tackle,</i></p> <p>☞ : <i>too late to tackle.</i></p> <p>These may be an excuse, but not assured exactly. Fundamentally, climate fixing technology is possible, but not politically at now.</p> </div>	(9) <i>I am being threatened not to confess fact by the wicked power,</i>
	(10) <i>Sinful mankind should be perished.</i>
	(11) <i>Dying is better than banning luxury life now</i>
	(12) <i>It is supreme chance to exterminate inferior races at once.</i>

[2] : **Decision Making on Die or Do by Reserving at least A Day.
The Rio Declaration: Principle 15 - the Precautionary Approach.**

In order to protect the environment, the precautionary approach shall be widely applied by States according to their capabilities. Where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation

(1), . . . , problems are decided by Yes or No by you !!.

It is not necessary full reading documents the evidences, but you should assure that

(a) Almost those are not authors opinion, but many different other's common view.

(b) Some evidences need scientific verification, however also student and engineer can do.

(1) **Paris Climate Agreement(2015) is hypocrite concealing Methane Catastrophe Risk.**

Following documents are the evidences.

Just do NOT tell them the monster exists: The Arctic Methane Monster

Following documents are **the evidences**.

How a 2 C temperature increase could change the planet

<https://www.cbc.ca/news2/interactives/2degrees/>

This is authors paper.

<http://www.777true.net/0.1C-Temperature-Rise-could-cause-Climate-Wild.pdf>

Critical 1.5°C rise for stable climate recovery, but not causing **irreversible chaotic climate**

could be accomplished by 80%CO2 cut by rapid implementation. This simulation was shown by author, but not IPCC. See **(B)**:

(A): Emergent Arctic Cooling Engineering to STOP Methane Catastrophe.

Arctic ocean sea floor warming would cause massive methane eruption toward rapid warming and following global methane fire storm causing fireball earth hell.

<http://arctic-news.blogspot.com/p/how-to-cool-arctic.html>

<http://www.777true.net/Arctic-Cooling-Engineering-the-Summary.pdf>

(B): Time for Plan B: Cutting Carbon Emissions 80 Percent by 2020, Lester R. Brown

<http://www.earth-policy.org/datacenter/pdf/80by2020notes.pdf>

Cut Carbon Emissions 80% by 2020

<https://sites.google.com/site/cutcarbonemissions80by2020/home>

The accelerating, worsening climate disruption and climate emergency means that we must now aim to **cut carbon emissions** (carbon dioxide, CO2, and methane, CH4) **80% by 2020**.

Below simulation was verified in following <by author Suzuki>

<http://www.777true.net/Accounting-principle-verify-reconstruction-the-Past-Climate-Records.pdf>

The Principle : Debt Heat Increase by a year = **Income(solar) – Outgo(cooling radiation)**.

The Equation : $C(dT/dt) = (1-a(t))I_s - @ (t) \sigma T^4$.

{C=ocean heat capacity, (dT/dt)=annual global temperature rise, a(t)=albedo, I_s=solar heat

@ (t)=cooling radiation output probability, σT^4 =cooling heat with Stefan Boltzmann constant}.

The verification curve in actual past data of temperature with CO2 concentration.

The big fluctuation $\pm 0.2^{\circ}\text{C}$ in the actual data is explained in next page(3)

+0.2°C error is due to a deficit in the model calculation, It is heat flow to below 800m depth in global ocean.

http://data.giss.nasa.gov/gistemp/graphs_v3/

*As for temperature non causaltic **random fluctuation** in actual graph(right).

None climate scientists explained it, but author (not professional in climate dynamics).

<http://www.777true.net/Uncertainty-Causes-in-Climate-Dynamics.pdf>

The amplitude deviation from average value is famous **normal distribution** due to famous **central limit theorem** in statistics. This agrees with actual data, however, author noticed the data contained also **solar periodic fluctuation**, which is **stronger at now**.

(3)As is seen in (A)&(B),climate fixing needs more than two tasks !!.

In the beginning role is ministry of emergency in government, This is kernel technical problems for **climate fixing** and for **the wartime economy**. Full reading needs long time, some knowledge and efforts to verify. Also author himself could not have gotten exact solutions at now. Because it's too big problem to accomplish by lone engineer. However,....

By anyhow, once **wartime regime** with exact **basic strategy(A)(B)(C)** approved, all nation people must engage each mission to accomplish. Above all, this is deadly problem of do or die !!. So author himself is optimistic in technical problems. Because, **once people had known deadly fact, they would endeavor to accomplish his mission by their best performance.**

Then can you be optimistic, or pessimistic ?.

(A)Arctic Cooling Engineering.

A possible method is summer solar heat intercepting by man made clouds, another is ice thickness increasing by spreading water in winter. Then problem is the outrageous scale and weather condition stability in the working fields.

<http://arctic-news.blogspot.com/p/how-to-cool-arctic.html>

<http://www.777true.net/Arctic-Cooling-Engineering-the-Summary.pdf>

This is certainly **awfully big scale and high cost engineering**, however non could prove it impossible. Certainly also author could not assure it's 100% success, **however nothing trying is 100% our perishing.**

* Note World military budget = 1.7 T \$ / y , World Oil spending = 26 T \$ / y !!

(B-1)New Energy Engineering.

<http://www.777true.net/100pct-Renewable-Energy-is-Possible.pdf>

Note Wind turbine and Solar panel had already become established technology, while solar and wind power resources are told enough for our demand at now. Thereby author himself is technically optimistic.

(B-2)Man Made CO2 Absorbing Engineering.

This is possible primitive method, and having possibility of mass industrialization.

<http://www.777true.net/Rapid-CO2-Absorption-with-Mineralisation-of-CO2-by-OLIVINE.pdf>

<https://trustmyscience.com/des-scientifiques-ont-trouve-un-moyen-efficace-de-transformer-dioxyde-de-carbone-en-charbon/>

(C)Life-Assurance-by-National-Strategy<the Wartime Economy>.

<http://www.777true.net/Life-Assurance-by-National-Strategy-in-coming-climate-WAR-TIME.pdf>

(A)(B) are battle field problem with weapon production one, while this is livelihood problem.

Beginning may be bitter, however it is the bitterness that drive rapid improvement.

Management on health and culture actions would become very important in the regime.

(4) Climate Fixing was Intercepted by Rockefeller the NAZIS founder, now which turned to be Global Exterminating Plot.

This is **kernel difficulty** which has been intercepting effective climate policy implementation. You could understand why the past international climate management did not go well.

(a) Following are dire predictions on coming climate hell world.

Global warming is inevitable and 5 billion until 2043 , , may die if nothing is done in time ,and they are hidden from worldwide population .. says

Jucelino Luz

<http://www.jucelinodaluz.com.br/aquecimento-global-inevitavel.htm>

<http://www.planetextinction.com/documents/What%20will%20climate%20change%20do%20to%20our%20planet.pdf>

If global warming continues at the current rate, we could be facing extinction. So what exactly is going to happen as the Earth heats up Here is a degree-by-degree guide with more detailed description after the summary.

(b) Climate fixing was Intercepted by Rockefeller.
