

Ruling Power Dynamics the Shortest, but Exact.

[1]: THE SATAN IDEOLOGY:

2024/11/22, 23

<https://www.azlyrics.com/lyrics/homefree/skullandbones.html>

In the beginning was a top ruling power the hereditary, their task was only preventing their highest status decline by frustrated mass people's riot <the CLASS STRUGGLE HISTORY>.

CIA Ruling Engineering by Deceiving & Threatening is causing *Upside Down World*.

① ruling by pleasure and pain

(1) In order to avert mass people's hostility against the richest ruler politics, entirely promoting economic growth for increasing mass people's pleasure and vanity and for making them fear for coming pain of decline and thereby not care for others.

(2) Promoting economic severe competition can not evade carelessness for others, but selfish.

(3) Promoting unlimited economic growth can not evade something catastrophe at last.

② ruling mass people by outstanding deceiving.

The US wealthiest could not get easiness without thoroughly whole world ruling, but such they failed and hid in fatal excess oil consumption causing mankind extinction.

(1) NAZIS was established by support of US wealthiest to purge Jew the class struggle religious people, visibly NAZIS was defeated, but invisibly survived in USA as military industry CIA regime by operation paper clip for their supreme purpose of (2).

(2) Now almost whole world has substantially been being ruled by USA the NAZIS reincarnated nation after the war by CIA operation with local proxy wars

(3) Role of once communism nation Russia & China (established by secret West support) is indispensable business partners of US military industry profit in the pseudo cold war.

President Putin now is not original one, but proxy clone, Secretary Xi Jinping is hereditary secretly connecting with USA. Note China big economic growth now was supported by USA with Japan. The both secret mission is suppressing able nation people by without liberty.

(4) 9/11, Iraqi war, Syria war, 3/11 Tohoku Japan earthquake, global pandemic COVID19, Ukraine war, and Gaza war now, all of those were conspired by USA.

(5) In order to finance the outstanding military budget, non-military US people work harder than any other nation ones in their severe competitive business field,

(6) Madness of US military industry business is causing whole world disasters. US people themselves know those well and they voted president Trump the anti war-businessman.

[2]: RELIGION PRINCIPLE:

Contrary to popular belief, voluntary reduction of desires is a sign of development, but not increasing unlimited desire.....Mahatma Gandhi

https://www.mkgandhi.org/articles/economic_development.php

In the beginning was God, revealed people life with justice, truth, and brotherhood in order to accomplish peace society for all the people's stable co-living life.

In the limited economic resource environment, the Gandhi teach is essential.

He knew now [the world is upside down](#), thereby we have to **turn** it !!!

APPENDIX-1:Coming Destiny of the World from 2024~"2040 the Endtime".

Recent years,planet people were awfully busy and confused by outbreak of COVID19,Ukraine war,and Gaza war,While time left for us has terribly become shorten. Then what we have to do in coming times ???!!!

①About on "2040 the Endtime"

<http://www.777true.net/COP29-the-Most-Irresponsible.pdf>

It is according to prediction by [scientist AMEG](#),Brazilian Prophet Jucelino,[Hitler](#).

Possible methods to evade the Endtime<launching global geo engineering>.

(a)<http://www.777true.net/Rapid-Launching-Climate-Engineering-could-Save-the-World.pdf>

(b)<https://arctic-news.blogspot.com/p/summary.html>

②If we go with the current trend !??.

(1)Already African people in climate worsening face famine,while most people not in famine at now are mainly worry on imminent economy and social,political instability.

(2)As for the major latter people,climate is too big to actually concern and also massive others will not do,nor talk on,thereby,they substantially will do nothing effective.

(3)During 4 years since **2020(the turning year)**, Covid,Ukraine,Gaza were too busy in global journalism,while climate have(not reportedly,but surely)become worsen and worsen.

Though,in 2024,many nation people reported unprecedented higher temperature.

(4)A doctor warns massive people dying due to Covid vaccine in coming 5 years.

(5)In 2030~2040,climate disaster would become imminent matter for almost people.

In such situation,people would recognize actual climate hell world,in at such times , there would be no hope for relief method,that is ,desperate filled world.

Above all,people can not evade to face terrible famine due to collapse of foods supply.

(6)According to below ,in such times,people would emigrate to seek foods.

[What will climate change do to our planet ?.by Richard Girling.](#)

<http://www.timesonline.co.uk/tol/news/science/article1480669.Ece>

This is vanished at now.In above,endtime of fireball earth is written

<http://www.777true.net/What-will-climate-change-do-to-our-planet.pdf>

Japanese PDF version.This is outrageous labor works by **Mr Mark Lynas(UK)**,

Note he is not pro expert,but **only he** surveyed coming **life events** at each temperature by massive library contents in Oxford Main School and Radcliffe Science Museum Hall.

NOTE:The most danger is positive feedback temperature acceleration, below 3°, those have already begun toward **runaway heating up**. That is,once,over temperature cross threshold,temperature acceleration would begin,,unless geo engineering.

Following are important citations.

**However, if the temperature exceeds 2 degrees, preventing mass starvation will be as difficult as stopping the rotation of the moon.*

***RED ALERT**

If the current trend of temperature rise continues, we will face extinction. What happens when it heats up there? Below is a guide for each temperature.

1c Increase *Oceans without ice layers absorb more heat and increase temperatures, 1/3 of the world experiences droughts, low-lying areas are flooded,*

2c Increase *Europe is hit by a heat wave, forests are hit by wildfires, plants shift from absorbing carbon to releasing it due to stress, and 1/3 of species face extinction*

3c Increase *Carbon release from vegetation & underground accelerates temperature, Amazon is dying, super hurricane coast hits, African famine,*

4c Increase *Runaway thaw of permafrost will make it impossible to stop the rise in global temperatures, much of the UK will be uninhabitable due to severe flooding, and areas in the Mediterranean will be abandoned.*

5c Increase *Methane emissions from the ocean floor accelerate global temperature rise, there is no ice at the poles, humans migrate to find food and survive, but in vain, many animals leave land.*

6c Increase *An apocalyptic storm, a sudden flood, hydrogen sulfide gas and methane seeping out competing to turn the entire globe into a ball of fire with the power of an atomic bomb, ending all life on Earth and leaving only bacteria to survive.*
