

(1) **Finance View**<Substantially Zero Debt-Bond Stable Society by Al Qur'an teach>.

This is ideal society of zero debt-bond even with enabling **society evolution**.

Society without Bankruptcy(Substantially Zero Debt-Bond Society⁽³⁾) in finance is Possible by **tax** on surplus(bond)holder and national **subsidy** for final consumer(debtor).

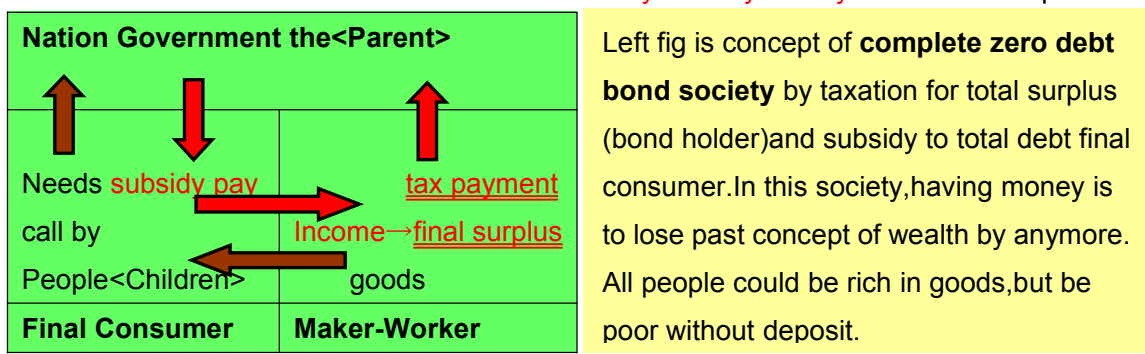

And they ask you what they should spend. Say, "The excess [beyond needs]."
Al Qur' an Cow 2-219.

0 = Total Bonds – Total Debts – <Zero Sum Theorem in Finance>.
<http://www.777true.net/Quick-Guide-to-Economy-Network-Dynamics.pdf>

This may be supreme teach of devotional ideology in economics to accomplish 0 debt-bond society. By above teach, surplus must be tax which turn to payment for final debtor.

Society Evolution(economic growing=new demand generating by consumer(final buyer)is to cause new investment for maker-seller)never fail increasing both debt and bond by equality.

However those can be canceled with each other **by subsidy** and **by taxation** on surplus.

In this meaning, bank must be national organization, but not private one.

(2) **BASIC INCOME:**
 Note in above, scheme, **needs call** could be "**basic income**" the constant annual subsidy to all national people without any condition". Then tax is the total surplus at end of fiscal year due to buying by the subsidy at stating fiscal year .

(3) **Advanced Stable Debt Society**<**progressive taxation on surplus**>.

Full zero debt-bond society may be ideal, but actuality demand financial affordability of **possessing deposit(bond)** by certain degree. Nothing money at end of fiscal year is trouble in actual economic activity. Then nation people could have deposit by certain degree, of which total sum must be **debt of national bank as upper limited by view of not causing inflation**. Then **the interest must be progressive negative one** to decrease the debt.
