[Dr. Kriengsak Attipornwanich, a doctor at the Ministry of Health's regular press conference, announced that the doctors given the Chinese woman a combination of these drugs and a 48-hour negative test for the virus 48 hours later.](#) "The test for a positive coronavirus became negative in 48 hours," said the patient, who was exhausted and was able to get up in bed 12 hours later.

With more than 300 deaths in China over the new coronavirus, a Chinese man (44) infected with the virus died on the 2nd in the Philippines, killing the first person outside China.

Thailand has reported 19 cases of the virus, which was reported to have occurred in Wuhan in Hubei Province in central China. Second most. Eight patients have already recovered and been discharged from Thailand, and 11 have been hospitalized. [Translation editing] AFPBB News
