

# How to Live in Coming the multi-Crisis.

Since 2020,we faced the multi-Crisis,Covid,Ukraine-Gaza wars outbreak,and financial and foods supply ones are coning in climate collapsing world.Then we must turn the basic economy ideology to save the minimum necessity by drastic cutting the wastes.2025/3/17,19,30

## [ 1 ]:What are the **wastes** and the **minimum necessity**,

This is the very basic concept for everyone's recognition.❶ is decisive for saving our life in crisis,but if we could eliminate crisis,❶ become almost waste.That is,our doing is wrong. However we lost a decisive necessity of climate mending engineering told by almost none.

### ❶**Negative-Industry** (Military-Industry-Police-Judiciary\_Medical).

If nothing trouble,they are of no use.Then we can get sufficient free by good crisis management.The free is to enhance more trouble free.However if you became serious, climate mending engineering becomes the most imminent task for the now world.If not,we are to face coming hell world before long.Then ❶ would have become dominant.

### ❷**Positive-Industry** (AgriFood-Energy\_consumer&producer goods,.....)

This is essential,thereby each nation economists must plan the necessity in emergency.

### ❸**Zero-Industry** (media-publisher\_education the information no hard goods)

Zero hard goods,but information for life causing better(normal),or wrong(abnormal).

## [ 2 ]:How to eliminate the origin of trouble.

Covid,Ukraine-Gaza wars outbreak,.....all of those are entirely wastes caused by our stupidity neglecting the evil origin,which can be eliminated by the global awaking on the truth.

### [ 3 ]:After all,all of nations would become a **Wartime Regime** ?!

The established global elites(in Deep State) plan is **global depopulation**{since 2020,we faced Covid,Ukraine-Gaza wars outbreak,....},thereby Trump admin now is lonely challenging to establish a self-sufficient nation in climate collapsing world without regarding other nations.While stupid ignorant us(the none American in DS ruling)are against his policy.

(1)Coming global financial crisis due to the huge accumulated debt in US would devastate almost nations,then jobless people in wrecked economy would become poverty in high price shortage foods.A rationing regime is inevitable hereafter ?!

(2) Economists should plan of increasing agri-product jobs by nation strategy..

(3) Drastic self-sufficient plan for energy is necessary in coming high inflation world.

It is most stupidity to build gorgeous buildings in big city (devastated in coming time) now, but build farms for grain (& solar, wind turbine) in local regions is wise.

### **APPENDIX1: China the at that place Facts.**

*Xi Jinping's unexpected announcement... A major incident occurs*

<https://www.youtube.com/watch?v=aICM6NRuJM4>

(1) The collapse of the real estate bubble has led to huge deficits and the major recession, it is difficult for college graduates to find employment, and older employees are facing laid off, creating frustration and unrest throughout the society. Such as paying salary to public officer become hard in some region.

(2) The government turn the economic policy toward developing domestic big market, developing more global market with keeping past status that almost global half nation's the biggest dealing nation as China.

(3) No intention of competing head-on with the hard-line Trump admin.

US high tariff policy is seriously damaging China economy toward more down falling.

(4) No intention of invading Taiwan due to the stronger negative risk than positive.

(5) However trouble with Phillipine would be possible

(6) The Xi Jinping administration is effectively expelling very many talented Chinese people to abroad especially Japan, but not USA.

Author view; So far seeing global, almost main nations are facing economy down turn.

That is, this is end times of the post war regime, and leading to a new era of turning from global maximizing to regional minimizing <**Bloc Economy after the 1929**>.

Evidently those are tickin time bombs. Thereby all the nations people must ready for coming days before long. It is inevitable also causing foods & oil hyper inflation in wrecked state.

\*The post war Japan provided US with both massive low-cost goods and **the top amounts of capital**, but it is bankrupt of worthless paper, so it needs to be repaid with collateral such as constant foods supply. Because once Japan trusted USA that Japan should concentrate industry, but not agriculture. Cheap grains are supplied by USA. Now Japans foods self-supplying rate is 38% the worst in advanced nations. Or it might be better that Japanese the gullible and stupid should be wiped out by prophesied coming Tsunami by at once not to encounter sufferer of famine in very cruel and awful hunger state nation same as the GAZA.

### (3)The Military Balance as for China and Russia.

*because the Chinese rise doesn't continue and Russia begins to fall apart again,*

*and we are once again the unipole, then we're back to arguing against liberal hegemony*

China military industry group(very secretly promising friendly relation with US)sometimes plays military provocation such as *the Taiwan crisis* in order to sale weapons to such Japan the gullible stupid. Note it is USA with Japan who once supported China to grow as now the pseudo competer nation ruled by dictator Xi Jinping.

### (4)The awful results of the Liberalism Hegemony.

*(doing freely anything we want the 1st principle).*

This is against the UN constitution law and the Japan constitution law. Since 1945, by the secret Akasaka meeting of US military and Japan high class officer the gullible stupid, they intervene in matters within the domestic jurisdiction, which is still keeping the **occupation regime** after the defeat war caused by dictator of the emperor (1945)..
